

CORPORATE

Intersystems Corporation
Cambridge, MA

Project Summary:

The design goal for Intersystem Corporation's office space was elegant and understated, reflecting their corporate culture while making the most of the building's exceptional location and views. The carpet, City Center manufactured with Antron® carpet fiber by Bentley, brought a sense of warmth to the minimalist architectural language, through the carpet's use of texture and subtle layers of pattern and color. The carpet style was chosen because it is not overly figurative, allowing the refined pattern to bring a sense of continuity

and integration to the collaborative workplace. The subtle texture and layers of the carpet partner with the rich tones of the wood ceiling to bring warmth and substance to the glass and steel stair and railing.

Firm: Paul Lukez Architecture
Manufacturer: Bentley
Carpet Style: City Center
