Antron® Legacy™ nylon

Fiber for Every Design
Antron® Legacy™ fiber offers limitless color possibilities that make uncommon spaces come to life. You want tremendous flexibility so that you can match those other important finishes of the space. Antron® Legacy™ is actually a family of fiber effects... delivering a range of aesthetics and textures, from silky fibers and robust wooly yarns, to shimmering metallics and varying tones of color. But unlike most families, this one plays well together in any combination for years to come.

How? It’s the DNA of Great Carpet
• Hollow filament fibers... hold their shape plus helps hide and release soil
• Type 6,6 nylon... yes, it does make a difference
• DuraTech™ soil resistance treatment... for enhanced soil release

What Does This All Mean to You?
• Up to 2.5x better texture retention\(^1\)... meaning the integrity of your design will hold up well beyond the honeymoon phase
• Up to 65% better soil resistance\(^2\)... makes cleaning so much easier
• Can last up to 75% longer\(^1,2\)... we've checked and verified
• Environmentally Preferable Product (EPP) certified\(^3\)... that's a rigorous 3rd party certification\(^4\) and we've got the stamps to prove it

Fiber Matters
• Range of options from ultra-deep color saturation to the lightest shades imaginable, giving you the keys to the creative kingdom
• Features exceptional soil resistance and appearance retention, for long-lasting performance and good looks
• A high-performance fiber that is resistant to crushing and matting, stain permeability and heat, thanks to type 6,6 nylon
• Certified as an Environmentally Preferable Product\(^3\) by Scientific Certification Systems
Any Way You Slice It...

Let’s face it: dirt and grime are inevitable. That’s why our fiber has a hollow filament shape (check him out in his headshot above)... it’s the key to diffusing light and hiding soil better between cleanings. Plus, its shape is strong, grooveless and cleans great. We can talk all day about fiber shape and why ours works harder to keep your carpet looking better longer, but we’ll move right along.

Fibers with Sustainable Attributes

Antron® Legacy™ fibers are certified as an Environmentally Preferable Product (EPP) by Scientific Certification Systems (SCS). In 2002, Antron® Lumena™ fiber and Antron® Legacy™ fibers were the first to receive the prestigious EPP Certification and since then, have been re-certified multiple times. Environmentally Preferable Products are defined as products that have a lesser or reduced effect on the environment when compared to competitive products that serve the same purpose.

The Grand Finale: Performance Testing

With high fiber performance standards, no one is harder on carpets than INVISTA. All carpets made of Antron® fibers must undergo a gauntlet of rigorous tests to ensure any carpet bearing the Antron® brand name lives up to our exacting performance standards.

To learn more, contact your local Fiber Consultant or visit antron.net.

1 All test results and claims made in this brochure are based upon a representative sample of carpets manufactured or sold in North America. Results for carpets manufactured and sold in your region may vary.
2 Carpets of Antron® fiber can last up to 75% longer than the majority of competitive carpets.
3 U.S. Executive Order 13101 (replaced by EO 13423).
4 Based on North American testing. Not applicable outside of North America.
