Suggested Antron® nylon type 6,6 specification for areas with Moderate traffic and some soiling where there is little exposure to sunlight or environmental contaminants and spills are unlikely - Tile

[ ] indicates an option for use

PART TWO PRODUCTS

2.1 MATERIALS

2.1.1 Carpet: Throughout this contract shall be of the same type and manufacture. Carpeting shall be:

2.1.1.1 Yarn: 100% Antron® nylon type 6,6 bulk continuous filament (BCF) nylon. Four-hole hollow filament fiber shape for optimum soil release and hiding capability. Fiber shape to have maximum Modification Ratio of 1.5 for soil release and texture retention. Fiber identification per AATCC TM 20. [No substitutions allowed].

2.1.1.2 Static Control: By permanent means (i.e. antistatic filaments) and without chemical treatment. Static generation below 3.5 kilovolts using AATCC TM 134 [Electrostatic Propensity (Step)].

2.1.1.3 Construction: Tufted or woven, loop pile, cut loop pile, tip-sheared loop pile or cut pile.

2.1.1.4 Dye Method: 100% Solution dyed (Antron® Lumena™ and/or Lumena DNA™ fiber), 100% Yarn dyed or combinations of both (Antron® Legacy™ fiber), as long as all requirements in this document are met.

2.1.1.5 Pile Weight: Minimum 14 oz./yd², ASTM D5848 test method.

2.1.1.6 Primary Backing: Tufted - 100% woven or non-woven synthetic.

2.1.1.7 Secondary Backing: Modular backing system. Manufacturer’s representative to supply detailed information on performance properties.

2.1.1.8 Resistance to Delamination: ASTM D3936 test method: minimum 3.5 lbs/inch, no delamination.

2.1.1.9 Tuft Bind: ASTM D1335 test method. Must resist a minimum of 10 lbs.-force, loop pile only.

2.1.1.10 Dimensional stability: Aachen method/ ISO 2551. Maximum Change +/- 0.20%.

2.1.1.11 Flammability:
Critical Radiant Flux: ASTM E648 test method, >0.45 watts/cm² and/or federal, state or local requirements. Class 1.
Smoke Density: ASTM E662 test method, rating to be less than 450 Dm in flaming mode (or to State Code).

2.1.1.12 Colorfastness to Light: SDN only: AATCC TM 16 part 3 to 200 AFU; minimum rating of 3-4 using AATCC Gray Scale for Color Change.

2.1.1.13 Colorfastness to atmospheric contaminants: SDN only: AATCC TM 164 (fade resistance to oxides of nitrogen) and AATCC TM 129 (fade resistance to ozone) for 2 cycles; minimum rating of 3 using AATCC Gray Scale for Color Change.
Suggested Antron® nylon type 6,6 specification for areas with Moderate traffic and some soiling where there is little exposure to sunlight or environmental contaminants and spills are unlikely - Tile
[ ] indicates an option for use

2.1.1.14 Colorfastness to crocking: AATCC TM 165, minimum rating of 4 using the AATCC Chromatic Transference Scale both wet and dry.

2.1.1.15 Stain Resistance: AATCC TM 175 Stain Resistance test; minimum rating of 8 using AATCC Red 40 Stain Scale. If SDN, AATCC TM 171 (HWE) for 2 cleanings, followed by AATCC TM 175 Stain Resistance test; minimum rating of 8 using AATCC Red 40 Stain Scale.

2.1.1.16 Soil Resistance: [Optional topical treatment with approved DuraTech® soil resistance formula on carpet with Antron® Lumena™ fiber and/or Lumena DNA™ fiber. ] Required DuraTech® soil resistance formula on carpet with Antron® Legacy™ fiber or when combined with Lumena™ fiber and/or Lumena DNA™ fiber.

2.1.1.17 Coloration: Minimum of 2 color hues.

2.1.1.18 Texture Retention Rating: Vettermann Drum test method, ASTM D5417, for 22,000 cycles with a minimum rating of a 2.5 for moderate traffic. Vettermann Drum test method, ASTM D5417, for 5,000 cycles with a minimum rating of a 3.0 for moderate traffic cut or tip shear styles. Rating using the appropriate Commercial Reference Scale for the construction per ASTM D7330 test method.

2.1.1.19 Recycling:
Used Carpet: Remove carpet and recycle regardless of manufacturer, fiber type or construction. Reclamation Agency and Carpet Remover shall certify in writing that Used Carpet was removed and recycled. Landfills are not an option.

The specifier reserves the right to choose the appropriate product, based on weighted evaluation.
